

amino5

ACBS GMS PBS

Description

Food for special medical purposes.

UCD amino5 is a powdered essential amino acid supplement.

Indications

For the dietary management of Urea Cycle Disorders (UCD) and other disorders where the use of essential amino acids is indicated, from 3 years of age.

Dosage and Administration

To be determined by the clinician or dietitian and is dependent on the age, body weight and medical condition of the patient.

Preparation Guidelines

To be determined by the clinician or dietitian. May be used in the dietary management of UCD in a variety of ways:

- Mixed in with protein substitute
- Added to modular feeds.
- Incorporated into other permitted food or drink.

UCD amino5 (6.6g) = 5g PE

IMPORTANT NOTICE

Must only be given to patients with proven UCD under strict medical supervision.

Not for use as a sole source of nutrition.

Suitable from 3 years

Diet must be supplemented with natural protein, water and other nutrients in prescribed quantities to supply fluid and general nutrition requirements.

For enteral use only.
